- *C#*

Education:

Althaus Digital

Date: January 2024 – March 2024

Degree: C# Code Bootcamp

University of Wolverhampton

Date: September 2018 – 2023

Degree: Mechanical Engineering

Final Grade: 2:1

Interests & Hobbies:

I have competed in Muay Thai and trained for the past 3 years to keep my mind and body healthy.

I game when I can with my friends, my favourite genres of games are; survival, automation (SATISFACTORY) and horror.

The little spare time I have since starting my programming journey, I have started creating a game as a side hobby

Languages:

- English – Fluent
- Farsi - Native

----- PERSONAL PROFILE -----

I am transitioning into software development, driven by a passion for technology and problem-solving from mechanical engineering and sales. While new to coding professionally, I've quickly gained proficiency through self-learning and hands-on projects, as shown through my development history below. My sales experience equips me with strong communication skills and a customer-centric mindset, complementing my technical abilities. Eager to apply my diverse skill set in collaborative environments to create innovative software solutions.

----- DEVELOPMENT HISTORY -----

InvestIQ:

This project utilises RESTful API's from real-time data gathered from Financial Modelling Preps API, to showcase the stock information on the top NASDAQ companies.

Challenges:

- API handling – using troubleshooting and debugging, I would meticulously go through the codebase to find the bug and fix the API call handling.

Janes Photography:

A website for a freelancing wedding photographer, showcasing her best work and a contact form for clients to reach out with specific enquiries.

Challenges:

- Photo layout – Changed the photo layout completely depending on the screen size, to ensure the user could view a high quality version of said image within the carousel.

Refreshed Solar:

A frontend project that utilises framer-motion and MUI for smooth transitions and a concise UI for ease of traversal. As well as, access to separate pages and components.

Challenges:

- File organisation – I categorised the files into a modular format, each module contained a components folder that held files which were used for the page withing module. A global folder was used for components that were reusable.

----- EMPLOYMENT HISTORY -----

Barista – Blank Street – Sept 2024 – Present

- Part-time barista whilst I continue my software development studies.

Cocktail Bartender – Cosy Club – Nov 2023 – Sept 2024

- Part-time cocktail bartender whilst I continued my software development studies.

Logistics Team Member – Rightio – Jan 2023 to Nov 2023

- Dealing with inbound customer calls relating to home maintenance enquires and ensuring empathetic customer care.
- Coaching new colleagues on the inhouse CRM system and the customer care protocols.
- Promoting the companys brand values by providing excellent customer care.

Bartender – Wetherspoons, Figure of Eight – July 2020 – Dec 2022

- Working the peak shifts on delivering high standard customer service in hospitality.

Recruitment Consultant – Joshua Robert Recruitment – Jan 2022 to Dec 2022

- Recruitment Consultant in the soft facilities management sector, I managed my portfolio of clients to place them in the public soft facilities sector.
- Consistently achieving my KPI targets of 20 new candidates per week through prioritisation of tasks to meet various deadlines.
- Organising weekly meetings regarding my status on my client base and future projections.
- Employing the use of Bullhorn and Microsoft Office tools to organise my client base.

Account & Finance Manager / Recruitment – Core Selection – Jan 2021 to Jan 2022

- Being adaptable whilst the company went through a branding from a gateway provider for the Kickstart Scheme and then transitioning into a recruitment company.
- Brokering relationships between external stakeholders and candidates.
- Utilising Sage 50 and Excel to assist Finance Managers transactions by cross-referencing and organising them into the appropriate sectors.
- Acquiring new clients and candidates following the company rebrand to a recruitment agency.

Team Member – Tim Hortons – Mar 2018 to Dec 2020

- Part-time hospitality role whilst I was studying mechanical engineering at the University of Wolverhampton.
